

Corporate Environmental Policy Statement

BYME Engineering (Hong Kong) Limited is committed to protecting the Environment through our initiatives, experiences, capabilities, expertise and resources applied to our design and installation of Building Services, Alterations and Additions Works (A&A Works) and Facility Management activities in order to reduce negative impact on the environment.

To achieve and maintain this ambition, our commitments are to:

- 1) Implement and maintain Environmental Management System in compliance with ISO 14001:2015 standards and provides permanent monitoring of the system through regular audits, reviews and inspections to ensure the delivery of a continuous improvement cycle,
- 2) Reduce and control the environmental impacts arising from all site activities by adopting and implementing adequate mitigating measures,
- 3) Offer environmental and sustainable solutions to our clients, including Modular Integrated Construction (MIC), Design for Manufacture and Assembly (DfMA) and other low carbon solutions to reduce carbon footprint and environmental pollution,
- 4) Ensure every effort is made to meet clients' / relevant interested parties' needs and expectations for achieving their satisfaction in delivering our products and services,
- 5) Comply with the statutory, regulatory and contractual requirements,
- 6) Identify and manage potential environmental risks (including climate change aspects) & opportunities proactively and implement solutions to mitigate them,
- 7) Ensure the establishment, planning and regular review of measurable Environmental Objectives. These objectives form part of our annual Management Review Meeting subjects,
- 8) Provide necessary resources to maintain the effectiveness of Environmental Management System.

This Policy is to be clearly communicated, understood and implemented at all levels within the company and our project sites, including our subcontractors, external providers and the interested parties. It will be reviewed on a regular basis for its effectiveness, through Management Review Meetings.

The measure of success of the Environmental Management System is its recognition by all BYME staff and their engagement and compliance with the Environmental Management System requirements throughout all stages from design, supply, installation, testing and commissioning, maintenance and facility management.
